

# BLACKBOARD TIP OF THE WEEK

## New Blackboard apps available

This spring and summer Blackboard introduced two new apps: a student app “[Blackboard App](#)” and an app for instructors “[Blackboard Instructor](#)”. These will replace the old app “Bb Mobile Learn”, which is no longer available.

Only some of the functionalities you have when accessing Blackboard via your browser are available in the app. You can e.g. view all content, send emails, and participate in discussions forums. Unfortunately, it is not possible to add new content or assignments from the app.

Watch a [demo video](#) for the new instructor app and [read more](#) about its possibilities.

Find [more information](#) on the student app.

Try it out and find out if it will support you in your teaching.

Kind regards,  
ST Learning Lab
