

## Ugens Blackboard tip – Muligheder med Student Preview

De fleste kender sikkert muligheden for at få vist et Student Preview af et kursus. Funktionen kan bruges til at se hvordan de studerende på kurset, ser det indhold som er i kursets menuer og prøve de forskellige funktioner af.

I øverste højre hjørne findes Student Preview knappen, som ser således ud:

Det der rent teknisk sker når man går i Student Preview er, at der oprettes en ekstra studerende i kurset (eget navn\_previewuser). Når man anvender Student Preview og vil tilbage til sin almindelige visning, bliver man bedt om at tage stilling til om man ønsker at xxx\_previewuser og de data "den" har genereret skal blive i kurset – og om xxx\_previewuser skal forblive studerende i kurset.

**Exit Student Preview**

You are leaving student preview. Using student preview created a student preview in your course with all of your activity as that student. This student and the related data may impact the course experience for you and your students. What would you like to do?

- Delete the preview user and all data (Recommended)**  
*If you are finished previewing the course as a student, delete the data and remove the preview user from your course.*
- Keep the preview user and all data**  
*If you are temporarily leaving the student preview to complete your task in your real account, keep the preview user and data. You can delete the user and data by returning to student preview and changing these settings.*
- Remember this choice and do not ask me again**  
*This can be changed in Student Preview Settings, located in the Student Preview control bar.*

Hvis man som instructor gerne vil prøve eksempelvis assignments af, besvare som xxx\_previewuser og derefter gå tilbage og give feedback som instructor, er man nødt til at vælge "Keep the preview user and all data", ellers forsvinder den opgave man i xxx\_previewuser har afleveret.

Det er altid muligt at ændre sine Student Preview Settings når man vil tilbage til egen visning:

**Student Preview Settings**

Do not ask me about the preview user when exiting student preview.  
Always take the following action:

- Delete the preview user and all data (Recommended)**  
*If you are finished previewing the course as a student, delete the data and remove the preview user from your course.*
- Keep the preview user and all data**  
*If you are temporarily leaving the student preview to complete your task in your real account, keep the preview user and data. You can delete the user and data by returning to student preview and changing these settings.*

1)   2)

En smart feature er, at når "Keep the preview user and all data" er slået til, vil ikonet ændres til at have

en grøn prik i midten:

Vær opmærksom på, at hvis du har valgt denne indstilling, så figurerer xxx\_previewuser på listen over studerende i Grade Centre, ligesom denne vil blive taget med ved automatisk fordeling af studerende i grupper (Random Enroll) og ved Peer and Self Assessment. Det er derfor en god ide at vælge indstillingen "Delete the preview user and all data" når man er færdig med at teste.

"Happy Blackboarding" og god weekend
